DETAILED ACTION

Drawings

The drawings are objected to as failing to comply with 37 CFR 1.84(p)(5) because they include the following reference sign(s) not mentioned in the description: reference numeral 11, apparently to the platform spring. A proposed drawing correction, corrected drawings, or amendment to the specification to add the reference sign(s) in the description, are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

Claim Objections

Claims 3, 5, 7 and 10 are objected to because of the following informalities: claims 3, 5 and 10 recite figure numbers which is improper and in claim 7, "wherever" should read "wherein". Appropriate correction is required.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-15 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 1, the claim is for a "brew head assembly" but there is not structure recited to the brew head elements. In claims 3, 5 and 10 applicant refers to figure numbers to apparently describe the structure. It is unclear from the claim which elements of the figures define the metes and bounds of the claims. In claim 13 it is

Art Unit: 1761

unclear if applicant is claiming a method of brewing or operation of a coffee maker or just an operation of a locking device associated therewith. The claim should be clarified as a possible restriction is forthcoming.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Fischer.

There is disclosed in Fischer a brewing head assembly, comprising: upper and lower brewing heads 1 and 2; a brewing cartridge support 23; a slide assembly 19, 25 associated with the upper and lower brew heads; a sealing assembly 21, 22 for providing a water tight connection between the upper and lower brewing heads; and a pop-up and roll-back assembly 20, 15 operatively linked to the brewing heads.

Allowable Subject Matter

Claims 2, 4, 6-9, 11 and 12 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, second paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The patents to Nello and Levinson are cited for their disclosure of the state of the art.
